#Inventingthefuture

Diploma in Cyber Security and Forensics

About the Programme

The programme is designed to prepare students to protect digital systems and investigate cyber threats in today's technology-driven world. The curriculum covers essential areas such as network security, ethical hacking, digital forensics, cybercrime investigation, information security management, and data protection. Students gain hands-on experience with industry tools and techniques used to detect, prevent, and respond to security breaches, as well as to recover and analyse digital evidence.

Entry Requirements

KCSE certificate with a minimum aggregate of C- (minus), a minimum grade of D- (minus) in Mathematics or a relevant qualification.
